FLOOD DAMAGE PREVENTION LOCAL LAW

SECTION 1.0

STATUTORY AUTHORIZATION AND PURPOSE

1.1 FINDINGS

The Board of Trustees of the Village of Andover finds that the potential and/or actual damages from flooding and erosion may be a problem to the residents of the Village of Andover and that such damages may include: destruction or loss of private and public housing, damage to public facilities, both publicly and privately owned, and injury to and loss of human life. In order to minimize the threat of such damages and to achieve the purposes and objectives hereinafter set forth, this Local Law is adopted.

1.2 STATEMENT OF PURPOSE

It is the purpose of this Local Law to promote the public health, safety, and general welfare, and to minimize public and private losses due to flood conditions in specific areas by provisions designed to:

- (1) regulate uses which are dangerous in health, safety and property due to water or erosion hazards, or which result in damaging increases in erosion or in flood heights or velocities;
- (2) require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction;
- (3) control the alteration of natural floodplains, stream channels and natural protective barriers which are involved in the accommodation of flood waters;
- (4) control filling, grading, dredging and other development which may increase erosion or flood damages;
- (5) regulate the construction of flood barriers which will unnaturally divert flood waters or which may increase flood hazards to other lands, and:
- (6) qualify and maintain for participation in the National Flood Insurance Program.

1.3 OBJECTIVES

The objectives of this Local Law are:

- (1) to protect human life and health;

- (6) to help maintain a stable tax base by providing for the sound use and development of areas of special flood hazard so as to minimize future blight areas:
- (7) to provide that developers are notified that property is in an area of special flood hazard; and,
- (8) to ensure that those who occupy the areas of special flood hazard assume responsibility for their actions.

SECTION 2.0
DEFINITIONS

Unless specifically defined below, words or phrases used in this Local Law shall be interpreted so as to give them the meaning they have in common usage and to give this Local Law its most reasonable application,

"Appeal" means a request for a review of the local "Administrator's interpretation of any provision of this Local Law or a request for a variance.

"Area of shallow flooding" means a designated AO or VO Zone on a community's Flood Insurance Rate Map (FIRM) with base flood depths from one to three feet where a clearly defined channel does not exist, where the path of flooding is unpredictable and indeterminate, and where velocity flow may be evident.

"Area of special flood hazard" is the land in the floodplain within a community subject to a one percent or greater chance of flooding in any given year. This area may be designated as Zone A, AE, AH, AO, A1-99, V, VO, VE OR V1-30. It is also commonly referred to as the base floodplain or 100-year floodplain.

:Base flood" means the flood having a one percent chance of being equaled or exceeded in any given year.

"Basement" means that portion of a building having its flood subgrade (below ground level) on all sides.

-- BUILDING

"Breakaway wall" means a wall that is not part of the structural support of the building and is intended through its design and construction to collapse under specific lateral loading forces without causing damage to the elevated portion of the building or the supporting foundation system.

"Building" means any structure built for support, shelter or enclosure for occupancy or storage.

"Cellar" has the same meaning as "Basement".

"Coastal high hazard area" means the area subject to high velocity waters including, but not limited to, hurricane wave wash. The area is designated on a FIRM as Zone V1-30, VE, VO or V.

"Development" means any man-made change to improved or unimproved real estate, including not limited to buildings or other structures, mining, dredging, filling, paving, excavation or drilling operations located within the area of special flood hazard.

"Elevated building" means a non-basement building built to have the lowest floor elevated above the ground level by means of fill, solid foundation perimeter walls, pilings, columns (posts and piers), or shear walls.

"Flood" or "Flooding" means a general and temporary condition of partial or complete inundation of normally dry land areas from:

- (1) the overflow of inland or tidal waters;
- (2) the unusual and rapid accumulation of runoff of surface waters from any source.

"Flood Boundary and Floodway Map (FBFM)" means an official map of the community published by the Federal Emergency Management Agency as part of a river line Community's Flood Insurance Study. The FBFM delineates a Regulatory Floodway along watercourses studied in detail in the Flood Insurance Study.

"Flood Hazard Boundary Map (FHBM)" means an official map of a community, issued by the Federal Emergency Management Agency, where the boundaries of the areas of special flood hazard have been defined but no water surface elevation is provided.

"Flood Insurance Rate Map (FIRM)" means an official map of a community, on which the Federal Emergency Management Agency has delineated both the areas of special flood hazard and the risk premium zones applicable to the community.

"Flood Insurance Study" is the official report provided by the Federal Emergency Management Agency. The report contains flood profiles, as well as the Flood Boundary Floodway Map and the water surface elevations of the base flood.

-- BUILDING

"Flood proofing" means any combination of structural and non-structural additions, changes, or adjustment to structures, which reduce or eliminate flood damage to real estate or improved real property, water and sanitary facilities, structures and their contents.

"Floodway" has the same meaning as "Regulatory Floodway".

"Floor" means the top surface of an enclosed area in a building (including basement), i.e., top of slab in concrete slab construction or top of wood flooring in wood frame construction.

"Functionally dependent use" means a use which cannot perform its intended purpose unless it is located or carried out in close proximity to water, such as a docking or port facility necessary for the loading and unloading of cargo or passengers, shipbuilding and ship repair. "Highest adjacent grade" means the highest natural elevation of the ground surface, prior to construction, next to the proposed walls of a structure.

"Lowest Floor" means lowest level including basement or cellar of the lowest enclosed area. An unfinished or flood resistant enclosure, usable solely for parking of vehicles, building access or storage in an area other than a basement is not considered a building's lowest floor; provided that such enclosure is not built so as to render the structure in violation of the applicable non-elevation design requirements of this Local Law.

"Manufactured home" means a structure, transportable in one or more sections, which is built on a permanent chassis and designed to be used with or without a permanent foundation when connected to the required utilities. The term also includes park trailers, travel trailers and similar transportable structures placed on a site for 180 consecutive days or longer and intended to be improved property.

"Sand Dunes" means naturally occurring accumulations of sand in ridges or mounds landward of the beach.

"Start of Construction" means the initiation, exclusive of planning and design, of any phase of a project, physical alteration of the property and shall include land preparation, such as clearing, grading and filling; installation of streets and/or walkways; excavation for a basement, footings, piers or foundations or the erection of temporary forms. It also includes the placement and/or installation on the property of accessory buildings (garages, sheds), storage trailers and building materials. For manufactured homes, the "actual start" means affixing of the manufactured home to its permanent site.

"Structure" means a walled and roofed building, a manufactured home, or a gas or liquid storage tank, that is principally above ground,.

"Substantial Improvement" means any repair, reconstruction or improvement of a structure, the cost of which equals or exceeds 50 percent of the market value of the structure either:

- (1) before the improvement or repair is started; or
- (2) if the structure has been damaged and is being restored, before the damage occurred.

For the purpose of this definition, "substantial improvement" is considered to commence when the first alteration of any wall, ceiling, floor or other structural part of the building commences, whether or not that alteration affects the external dimensions of the structure. The term does not, however include either:

- (1) any project for improvement of a structure to comply with existing state or local building, fire, health, sanitary or safety code specifications which are solely necessary to assure safe living conditions; or
- (2) any alteration of a structure or contributing structure listed on the National Register of Historic Places or a State Inventory of Historic Places.

SECTION 5.0
PROVISIONS FOR FLOOD REDUCTION

5.1 GENERAL STANDARDS

In all area of special flood hazards, the following standards are required:

5.1-1 ANCHORING

(1) All new construction and substantial improvements shall be anchored to prevent flotation, collapse or lateral movement of the structure.

(2) All manufactured homes shall be installed using methods and practices which minimize flood damage. Manufactured homes must be elevated and anchored to resist flotation, collapse or lateral movement. Manufactured homes shall be elevated to or above the base flood elevation or 2 feet above the highest adjacent grade when no base flood elevation has been determined. Methods of anchoring may include, but are not to be limited to, use of over-the-top or frame ties to ground anchors. This requirement is in addition to applicable State and local anchoring requirements for resisting wind forces.

5.1-2 CONSTRUCTION MATERIALS AND METHODS

(1) All new construction and substantial improvements shall be constructed with materials and utility equipment resistant to flood damage.

(2) All new construction and substantial improvements shall be constructed using methods and practices that minimize flood damage.

5.1-3 UTILITIES

(1) Electrical, heating, ventilation, plumbing, air conditioning equipment and other service facilities shall be designed and/or located so as to prevent water from entering or accumulating within the components during conditions of flooding. When designed for location below the base flood elevation, a professional engineer's or architect's certification is required.

(2) All new and replacement water supply systems shall be designed to minimize or eliminate infiltration of flood waters into the system.

(3) New and replacement sanitary sewage systems shall be designed to minimize or eliminate infiltration of flood waters; and:

(4) On-site waste disposal systems shall be located to avoid impairment to them or contamination from them during flooding.

5.1-4 SUBDIVISION PROPOSALS

(1) All subdivision proposals shall be consistent with the need to minimize flood damage;

(2) All subdivision proposals shall have public utilities and facilities such as sewer, gas, electrical and water systems located and constructed to minimize flood damage;

(3) All subdivision proposals shall have adequate drainage provided to reduce exposure to flood damage; and:

(4) Base flood elevation data shall be provided for subdivision proposals and other proposed developments (including proposals for manufactured home parks and subdivisions) greater than either 50 lots or 5 acres.

5.1-5 ENCROACHMENTS

(1) All proposed development in riverine situations where no flood elevation data is available (unnumbered A Zones) shall be analyzed to determine the effects on the flood carrying capacity of the area of special flood hazards set forth in Section 4.3-1 (3), Permit Review. This may require the submission of additional technical data to assist in the determination.

(2) In all area of special flood hazard in which base flood elevation data is available pursuant to Section 4.3-2 of Section 5.1-4(4) and no floodway has been determined, the cumulative effects of any proposed development, when combined with all other existing and anticipated development, shall not increase the water surface elevation of the base flood more than one foot at any point.

(3) In all areas of the special flood hazard where floodway data is provided or available pursuant to Section 4.3-2, the requirements of Section 5.3, Floodways, shall apply.

-- BUILDING

5.2 SPECIFIC STANDARDS

In all areas of special flood hazards where base flood elevation data has been provided as set forth in Section 3.2 BASIS FOR ESTABLISHING THE AREAS OF SPECIAL FLOOD HAZARDS and Section 4.3-2, USE OF OTHER BASE FLOOD DATA, the following standards are required:

5.2-1 RESIDENTIAL CONSTRUCTION

New construction and substantial improvements of any resident structure shall:

- (1) have the lowest floor, including basement or cellar, elevated to or above the base flood elevation;
- (2) have fully enclosed areas below the lowest floor that are subject to flooding designed to automatically equalize hydrostatic flood forces on exterior walls by allowing for the entry and exit of floodwaters. Designs for meeting this requirement must either be certified by a licensed professional engineer or architect or meet or exceed the following minimum criteria:
 - (i) a minimum of two openings having a total net area of not less than one square inch for every square foot of enclosed area subject to flooding;
 - (ii) the bottom of all such openings shall be no higher than one foot above the lowest adjacent finished grade; and
 - (iii) openings may be equipped with louvers, valves, screens or other coverings or devices provided they permit the automatic entry and exit of floodwaters.

5.2-2 NONRESIDENTIAL CONSTRUCTION

New construction and substantial improvements of any commercial, industrial or other non-residential structure, together with attendant utility and sanitary facilities, shall either: have the lowest floor, including basement or cellar, elevated to or above the base flood elevation; or be flood-proofed so that the structure is watertight below the base flood level with walls substantially impermeable to the passage of water. All structural components located below the base flood level must be capable of resisting hydrostatic and hydrodynamic loads and the effects of buoyancy.

- (1) If the structure is to be elevated, fully enclosed areas below the base flood elevation shall be designed to automatically (without human intervention) allow for the entry and exit of floodwaters for the purpose of equalizing hydrostatic flood forces on exterior walls. Designs for meeting this requirement must either be certified by a licensed professional engineer or a licensed architect or meet the following criteria:

- (i) a minimum of two openings having a total net area not less than one square inch for every square foot of enclosed area subject to flooding;
 - (ii) the bottom of all such openings shall be no higher than one foot above the lowest adjacent finished grade; and: screens or other coverings or devices provided they permit the automatic entry and exit of floodwaters.
- (2) If the structure is to be flood-proofed:
- (i) a licensed professional engineer or architect shall develop and/or review structural design, specifications and plans for the construction, and shall certify that the design and methods of construction are in accordance with the accepted standards of practice to make the structure watertight with walls substantially impermeable to the passage of water, with structural components having the capability of resisting hydrostatic and hydrodynamic loads and effects of buoyancy; and:

The Local Administrator shall maintain on record a copy of all such certificates noted in this section.

5.2-3 CONSTRUCTION STANDARDS FOR AREAS OF SPECIAL FLOOD HAZARDS WITHOUT BASE FLOOD ELEVATIONS

New construction or substantial improvements of structures including manufactured homes shall have the lowest floor including basement elevated to or above the base flood elevation as may be determined in Section 4.3-(2) or 2 feet above the highest adjacent grade where no elevation data is available.

(1) New construction or substantial improvements of structure including manufactured homes shall have the lowest floor (including basement) elevated at least 2 feet above the highest adjacent grade next to the proposed foundation of the structure.

(2) Fully enclosed areas below the lowest floor that are subject to flooding shall be designed to automatically (without human intervention) allow for the entry and exit of floodwaters for the purpose of equalizing hydrostatic flood forces on exterior walls. Designs for meeting this requirement must either be certified by a licensed professional engineer or a licensed architect or meet the following criteria:

- (i) a minimum of two openings having a total net area of not less than one square inch for every square foot of enclosed area subject to flooding;

- (ii) the bottom of all such openings shall be no higher than one foot above the lowest adjacent finished grade;
- (iii) openings may be equipped with louvers, valves, screens or other coverings or devices provided they permit the automatic entry and exit of floodwaters.

5.3 FLOODWAYS

Located within areas of special flood hazard area areas designated as floodways (see definition, Section 2.0). The floodway is an extremely hazardous area due to high velocity flood waters carrying debris and posing additional threats from potential erosion forces. When floodway data is available for a particular site as provided by Section 3.2 and Section 1.3-2, all encroachments including fill, new construction, substantial improvements and other development are prohibited within the limits of the floodway unless a technical evaluation demonstrates that such encroachments shall not result in any increase in flood levels during the occurrence of the base flood discharge.

 - (ii) the danger to life and property due to flooding or erosion damage;
 - (iii) the susceptibility of the proposed facility and its contents to flood damage and the effect of such damage on the individual owner;

- (iv) the importance of the services provided by the proposed facility to the community;
- (v) the necessity to the facility of a waterfront location, where applicable;
- (vi) the availability of alternative locations for the proposed use which are not subject to flooding or erosion damage;
- (vii) the compatibility of the proposed use with existing and anticipated development;
- (viii) the relationship of the proposed use to the comprehensive plan and flood plain management program of that area;
- (ix) the safety of access to the property in times of flood for ordinary and emergency vehicles;
- (x) the costs to local governments and the dangers associated with conducting search and rescue operations during periods of flooding;
- (xi) the expected heights, velocity, duration, rate of rise and sediment transport of the flood waters and the effects of wave action, if applicable, expected at the site; and:]
- (xii) the costs of providing governmental services during and after flood conditions, including search and rescue operations, maintenance and repair of public utilities and facilities such as sewer, gas, electrical and water systems and streets and bridges.

(5) Upon consideration of the factors of Section 69.1(4) and the purposes of this Local Law, the Appeals Board may attach such conditions to the granting of variances as it deems necessary to further the purpose of this Local Law.

As the lot size increases beyond the one-half acre, the technical justification required for issuing the variance increases.

-- BUILDING

(2) Variances may be issued for the reconstruction, rehabilitation or restoration of structures and contributing structures listed on the National Register of Historic Places or the State Inventory of Historic Places, without regard to the contributing structures procedures set forth in the remainder of this section.

(3) Variances may be issued by as community for new construction and substantial improvements and for other development necessary for the conduct of a functionally dependent use provided that:

(i) the criteria of subparagraphs 1, 4, 5 and 6 of this section are met;

(ii) the structure or other development is protected by methods that minimize flood damages during the base flood and create no additional threat to public safety.

(4) Variances shall not be issued within any designated floodway if any increase in flood levels during the base flood discharge would result.

(5) Variances shall only be issued upon a determination that the variance is the minimum necessary, considering the flood hazard, to afford relief.

(6) Variances shall only be issued upon receiving written justifications:

(i) a showing of good and sufficient cause;

(ii) a determination that failure to grant the variance would result in exceptional hardship to the applicant; and:

(iii) a determination that the granting of a variance will not result in increased flood heights, additional threats to public safety, extraordinary public expense, create nuisances, cause fraud on or victimization of the public or conflict with existing local laws or ordinances.

(7) Any applicant to whom a variance is granted for a building with the lowest floor below the base flood elevation shall be given written notice that the cost of flood insurance will be commensurate with the increased risk resulting from lowest floor elevation.

The Inspector shall not make inspections or existing installations in owner-occupied, single-family dwellings except where such inspection shall have been requested by the Mayor. In the event of an emergency, it is the duty of the Inspector to make electrical inspections upon the oral request of the Mayor. It shall be the duty of the Inspector to furnish written reports to the Mayor and owners and/or lessees of property where defective electrical installations and equipment are found upon inspection. He shall authorize the issuing of a Certificate of Compliance when electrical installations and equipment are in conformity with this Local Law. He shall direct that a copy of the Certificate of Compliance be sent to the Village of Andover to the attention of the Mayor.

The repair or changing of switches and outlets, not requiring additional wiring, in single-family dwellings shall not require application for inspection. It shall be a violation of this Local Law for a person, firm or corporation to connect or cause to be connected electrical wiring in or on properties for light, heat or power, to any source of electrical energy supply, prior to the issuance of a temporary certificate, or a Certificate of Compliance, by a village-approved inspection agency or inspector. It shall be a violation of this Local Law for any person, firm or corporation to operate wiring after having been notified by the Inspector that such wiring is defective.

DS

Section 7. PENALTY FOR VIOLATIONS

Any person, firm or corporation who shall violate any of the provisions of this Local Law or any rule or regulation made pursuant thereto shall be guilty of disorderly conduct and shall be a disorderly person, and upon conviction thereof, may be punished by a fine of not more than twenty-five dollars (\$25) and each day on which such violation continues shall constitute a separate offense.

Section 8. LOCAL LAW NTO APPLICABLE IN CERTAIN CASES

The provisions of this Local Law shall not apply to electrical installation in mines, ships, railway cars, automotive equipment or the installation of equipment employed by a railway, electrical or communication utility in the exercise of its function as a utility, and located outdoors or in buildings used exclusively for that purpose. This Local Law shall not apply to and work involved in the manufacture, assembly, test or repair of electrical machinery, apparatus, materials and equipment by a person, firm or corporation engaged in electrical manufacturing as their principal business. It shall not apply to any building which is owned or leased in its entirety by the Government of the United States or the State of New York. Portions of this Local Law which require application for inspection shall not apply to persons, firms or corporations regularly employed in manufacturing in the Village of Andover when such persons, firms or corporations shall have certified to the Mayor that they regularly employ one (1) or more journeyman electricians, whose principal duties are installation, maintenance and repair of electrical machinery, appliances, equipment and wiring for electric light, heat or power (hereinafter called "electrical work") in or upon the premises used by the applicant in the conduct of manufacturing; and by reason of the amount and frequency of electrical work so performed upon the applicant's premises, compliance with the provisions of this Local Law would impose an undue burden on the applicant's conduct of manufacturing operations. The term "journeyman electrician" shall mean a person who has completed an apprentice course or received equivalent training, or had equivalent experience of at least three (3) years in electrical work.

Section 9. NO WAIVER OR ASSUMPTION OF LIABILITY

This Local Law shall not be construed to relieve from or lessen the responsibility of any person owning, operating, controlling or installing any electrical wiring, devices, appliances or equipment for loss of life or damage to person or property caused by any defect therein, nor shall the Village of Andover or the Village-approved inspection agencies be deemed to have assumed any such liability by reason of any inspection made pursuant to this Local Law.

Section 10. SEPARABILITY CLAUSE

If any part or provision of this Local Law or the application thereof to any person or circumstances be adjudged invalid by any court of competent jurisdiction, such judgment shall be confined in its operation to the part or provision or application directly involved in the controversy in which such judgment shall have been rendered, and shall not affect or impair the validity of the remainder of the Local Law or the application thereof to other persons or circumstances, and the Trustees of the Village of Andover hereby declare that they would have passed this Local Law or the remainder thereof had such invalid application or invalid provision been apparent.

Section 11. REPEALING PROVISIONS

A Local Law establishing a curfew for the Village of Andover.

Be it enacted by the Board of Trustees of the Village of Andover as follows:

Section 1. LEGISLATIVE INTENT

It is the intent of the Board of Trustees of the Village of Andover in enacting this Local Law to promote the health, safety and welfare of the residents of said Village by providing a law which will prohibit the congregating and roaming of groups of young people within the Village after certain specified hours for no legitimate purpose. It is the belief of the Board of Trustees that such gatherings and wanderings lead to Offenses Against Public Order as defined in Article 240 of the Penal Law of the State of New York and Criminal Mischief as defined in Article 145 of said law. It is believed that this Local Law, when supplemented by the provisions of the Penal Law of the State of New York, will end such congregation and wandering within the Village and the associated Criminal Mischief and Offenses Against Public Order which result. Further, it is believed that this Local Law, when supplemented by Article 20 of the Penal Law, will provide for the responsibility of parents and/or guardians for the actions of such young persons as provided in this Local Law.

Section 2. LOITERING OF MINORS PROHIBITED

It shall be unlawful for any minor under the age of eighteen years to loiter, idle, wander, stroll, or lay in or upon the public streets, sidewalks, highways, roads, alleys, parks, public buildings, places of amusement and entertainment, vacant lots or other unsupervised places, between the hours of 10:00 p.m. and 6:00 a.m. of the following day, however, that the provisions of this section shall not apply to a minor accompanied by his or her parent, guardian or other adult person having the care and custody of the minor, or where the minor is upon an emergency errand or legitimate business directed by his or her parent, guardian or other adult person having the care and custody of the minor.

This section shall not be construed to prohibit a minor under the age of eighteen years from going directly to his home or place of residence from any place of entertainment, church, school activity, place of employment, or any other social or group activity sponsored by a religious, charitable, educational, public institution or group.

-- CURFEW

Section 3. RESPONSIBILITY OF PARENTS

It shall be unlawful for the parents, guardian or other adult person having the care and custody of a minor under the age of sixteen years to permit such minor to loiter, idle, wander, stroll or play in or upon the public streets, sidewalks, highways, roads, alleys, parks, playgrounds or other public places, and public buildings, places of amusement and entertainment, vacant lots or other unsupervised places, between the hours of 10:00 p.m. and 6:00 a.m. of the following day, provided however, that the provisions of this section do not apply when the minor is accompanied by his parents, guardian or other adult person having the care or custody of the minor.

Each violation of this section shall constitute a separate offense.

Section 4. PENALTIES

Any minor under the age of sixteen violating the provisions of Section 2 hereof, shall be taken into custody and the parents, guardian or other adult person having the control of such child or minor shall be personally notified of such violation and further said minor apprehended for the violation of this Local Law shall be charged in the Family Court with the violation of this Local Law, and dealt with therein under the Family Court Act of the State of New York.

Any parent, guardian or other adult person having the care and custody of such minor violating Section 3 hereof, shall be a disorderly person, and such violation shall constitute disorderly conduct and, in addition, such person shall become liable for a penalty of not less than ten (\$10.00) dollars, for a second violation fifty (\$50.00) dollars, for a third violation one hundred (\$100) dollars, and for each additional violation, and additional fifty (\$50) dollars up to a maximum of two hundred fifty (\$250) dollars after six violations. The fine, if imposed, shall be paid upon conviction and, if not paid, the Magistrate shall commit the defendant to the County Jail for a term not exceeding one day for each dollar of the fine imposed.

Section 5. SEPARABILITY OF PROVISIONS

It is the intention of the Board of Trustees that each separate provision of this Local Law shall be deemed independent of all other provisions herein, and it is further the intention of the Board of Trustees that if any provision of this Local Law be declared invalid, all other provisions thereof shall remain valid and enforceable.

Section 6. REPEAL OF CONFLICTING ORDINANCES
